REED CONSTRUCTION COMPLETES SAME DAY SURGERY CENTER AT RUSH OAK PARK HOSPITAL

CHICAGO – Reed Construction is pleased to announce that the firm has completed a 10,000 square foot build-out of the new Same Day Surgery Center within the Rush Oak Park Hospital located at 520 S. Maple in Oak Park, Illinois.

Reed was selected by Rush Oak Park Hospital for its ability to complete complex projects on-time and within budget. The project began with the complete demolition of the existing administrative space followed by the construction of recovery bays, nursing stations, and utility rooms. The project also included a new main lobby area with an information desk and extensive millwork wall panels. Additionally, new HVAC, plumbing, electrical, fire protection and medical gas systems were built.

Scott L. Pickands, Executive Vice President for Reed Construction, led the project team. Proteus Group provided the architectural and engineering services for the Same Day Surgery Center.

Rush Oak Park Hospital has been a key health care provider in the Oak Park and River Forest community for more than 100 years. As a clinical partner of Rush University Medical Center, Rush Oak Park Hospital combines the convenience and personal touch of a community hospital with the technology and expertise of a major university medical center.

Reed Construction, established in 1893, is a full-service general contractor specializing in the healthcare, corporate, government, laboratory, mission critical, higher education, hospitality, and industrial markets. With offices in Chicago and Washington D.C., Reed project teams are personally led by senior level professionals experienced in complex projects and dedicated to providing clients with professionalism, integrity and quality.
